Fixing Frames To Canvas.

You could use a glue gun to fit the canvas in the frame, or you could use the picture fixing clips that are included. They will be supplied loose as fitting them could result in damage to the surface of other frames when being shipped. I can fit them but there would be a charge of £2.00 per frame – it’s not the cost of the fixings, but the length of time it takes to fit them.

The assembled frames and canvas can be attached to a wall using 3M Command strips (not included). I also supply D rings and cord to allow then frames to be fixed to wall hooks

Prices For Floating Frames

The floating frame profile is as shown right. Floating frames will be available in either black or white.
